

WEEK 9

College Event Registration UI Using React JSX

Aim

To develop a responsive user interface for a real-world college event registration system using React JSX, with navigation links, event details, and a student registration form.

Algorithm

1. Create a React project using Vite and open it in Visual Studio Code.
2. Create the interface in App.jsx using JSX sections for Home, Events, Registration, and About.
3. Add navigation links that move to the corresponding sections of the webpage.
4. Create a registration form with name, email, phone, department, year, event, gender, and password fields.
5. Use the form submit event to check that the passwords match and display an alert message.
6. Style the page in App.css and add responsive styling for smaller screens.
7. Run the project using `npm run dev`, open the local URL, and test the navigation and form.

Program 1: App.jsx

```
import './App.css';

function App() {
  function register(e) {
    e.preventDefault();

    const password = document.getElementById("password").value;
    const confirm = document.getElementById("confirm").value;

    if (password !== confirm) {
      alert("Passwords do not match!");
    } else {
      alert("Registration Successful!");
    }
  }

  return (
    <
      <nav>
        <h2>College Events</h2>
        <div>
          <a href="#home">Home</a>
          <a href="#events">Events</a>
          <a href="#about">About</a>
        </div>
      </nav>

      <section id="home" className="home">
```

```

    <h1>TechFest 2026</h1>
    <p>        Welcome to our annual college
technical fest!
    Participate in exciting events and win prizes.
    </p>
    <p>Date: October 15, 2026</p>
    <p>Venue: ANITS Campus</p>
</section>
<section id="events">
    <h2>Our Events</h2>
    <div className="events">
        <div>Coding Challenge</div>
        <div>Technical Quiz</div>
        <div>Hackathon</div>
        <div>Paper Presentation</div>
    </div>
</section>

<section className="registration">
    <h2>Student Registration</h2>
    <form onSubmit={register}>
        <label>Full Name</label>
        <input type="text" placeholder="Enter your name" required />

        <label>Email</label>
        <input type="email" placeholder="Enter your email" required />

        <label>Phone Number</label>
        <input type="tel" placeholder="Enter phone number" required />

        <label>Department</label>
        <select required>
            <option value="">Select Department</option>
            <option>CSE</option>
            <option>CSE (AI & ML)</option>
            <option>ECE</option>
            <option>EEE</option>
        </select>

        <label>Year</label>
        <select required>
            <option value="">Select Year</option>
            <option>1st Year</option>
            <option>2nd Year</option>
            <option>3rd Year</option>
            <option>4th Year</option>
        </select>

        <label>Select Event</label>
        <select required>

```

```

    <option value="">Choose Event</option>
    <option>Coding Challenge</option>
    <option>Technical Quiz</option>
    <option>Hackathon</option>
    <option>Paper Presentation</option>
  </select>

  <label>Gender</label>
  <div className="gender">
    <label><input type="radio" name="gender" required /> Male</label>
    <label><input type="radio" name="gender" /> Female</label>
    <label><input type="radio" name="gender" /> Other</label>
  </div>

  <label>Password</label>
  <input id="password" type="password" required />

  <label>Confirm Password</label>
  <input id="confirm" type="password" required />

  <button type="submit">Register Now</button>
</form>
</section>

<section id="about" className="about">
  <h2>About TechFest</h2>
  <p>
    TechFest 2026 encourages students to
    participate in coding, quizzes, hackathons and technical
    activities.
  </p>
</section>
</>
); }

```

```
export default App;
```

Program 2: App.css

```
* {
  box-sizing:
  border-box; }

```

```
html { scroll-behavior:
smooth; }

```

```
body { margin: 0; font-
family: Arial, sans-serif;
background: #f2f5f9; }

```

```
nav { background:
#23439a; color: white;
padding: 18px 5%;
display: flex; justify-
content: center; align-

```

```
items: center; position:
relative; }
```

```
nav h2 { margin:
0; text-align:
center; }
```

```
nav div { position:
absolute; right:
5%; }
```

```
nav a { color: white;
text-decoration: none;
margin-left: 20px; }
```

```
.home { text-
align: center;
padding: 40px
20px; }
```

```
.home h1 {
color: #23439a;
font-size: 40px;
}
```

```
.home p { color:
#555; line-
height: 1.6; }
```

```
#events { text-
align: center;
padding: 30px
15px; }
```

```
.events { display: flex;
justify-content: center;
flex-wrap: wrap; gap:
15px; }
```

```
.events div {
background: white;
padding: 25px;
border-radius: 8px;
width: 200px; }
```

```
.registration {
background:
white; max-
width: 500px;
width: 90%;
margin: 35px
auto; padding:
```

```

25px;    border-
radius:   10px;
box-shadow: 0
3px 12px #ccc; }

.registration h2,
.about h2, #events
h2 {      color:
#23439a;   text-
align: center; }

form label {
display:   block;
margin-top: 12px;
font-weight: bold;
}

input:not([type="radio"
]), select { width:
100%; padding: 10px;
margin-top: 5px;
border: 1px solid #ccc;
border-radius: 5px; }

.gender {
display: flex;
gap: 15px; }

.gender label { font-
weight: normal; }

.gender input
{ width:
auto; }

button { width:
100%; padding:
12px; margin-top:
22px; background:
#23439a; color:
white; border:
none; border-
radius: 5px; cursor:
pointer; }

button:hover {
background:
#172f73; }

.about {
background:
#e8edf8; text-

```

```

align:      center;
padding:    40px
20px; }

.about p {  line-
height: 1.6; }

@media      (max-width:
600px) {   nav {    flex-
direction:  column;
gap: 15px;  }

  nav      div      {
position: static; }

  nav      a      {
margin: 8px;
}
}

```

Program 3: main.jsx

```

import { StrictMode } from "react";
import { createRoot } from "react-
dom/client"; import "./index.css"; import
App from "./App.jsx";

createRoot(document.getElementById("root")).render(
<StrictMode>
  <App />
</StrictMode>
);

```

Program 4: index.css

```

html, body, #root { margin:
0; min-height: 100%; }

```

Steps to Run the Program

1. Install Node.js and open the project folder college-event-registration in Visual Studio Code.
2. Open Terminal → New Terminal.
3. If the terminal is not already inside the project folder, run: `cd college-event-registration`
4. Install dependencies for the first run using: `npm install`
5. Start the development server using: `npm run dev`
6. Open the local URL displayed in the terminal, usually `http://localhost:5173/`.
7. Click Home, Events, and About to test navigation. Fill in the form and submit it. Matching passwords show a success alert; mismatched passwords show an error alert.

Result

Thus, a responsive College Event Registration user interface was developed successfully using React JSX and CSS. The webpage includes navigation, event information, a registration form, basic validation, and a success/error alert.
